PRICE LIST

For Spring and Fall of 1926

OF

PRINCESS ANNE, MARYLAND

We wish to extend to our many customers and friends our greetings for the year 1926. May it be the most joyful of all to you.

This price list is complete and covers all of the fine fruits, hardy Perennials, Shrubs, Shade Trees and Evergreens described in our large catalogue and is our only salesman. Our line of stock is complete and has proven its superiority of quality everywhere—Just what you need to make your plantings a success.

Our prices are direct to the planter and as low as it is possible to produce the quality of stock we have for this year's shipments and still maintain our high standard of "TRUE TO NAME" Trees, Vines and Plants. We refer you to some of the many satisfied customers whose testimonials are in our large catalogue as to the quality of our stock and the personal interest given to every order and to the Salisbury National Bank, Salisbury, Md. and Peoples Bank of Somerset County, Princess Anne, Md., as to our responsibility.

There is a shortage of many lines of nursery stock this spring, especially Peach trees and WE REQUEST our customers to read our large catalogue carefully—go over our prices, always considering our high standard of quality when comparing our prices with those of other nurseries, and make up their ORDERS EARLY and send them in so they will not be disappointed by not being able to get what they want, should they put off ordering till late in the season. If you so desire, you may send one-third of the amount of order with the order and have trees reserved for you and send balance when you wish shipment of stock made.

Looking forward to receiving your order and being able to prove to you our personal interest and desire to make more satisfied customers, we are,

Yours truly,

BOUNTIFUL RIDGE NURSERIES.

NOTICE

In some way the printer when making the final run of our new catalogue omitted the Courtland Apple and the Brackett Peach, and we are supplying a description of these here for your convenience.

THE BRACKETT PEACH

This is a comparative new variety in some sections but has been tried and proven one of the most profitable peaches in the south. Its season is about five days after the Elberta, with a beautiful orange yellow skin tinged with carmine. Flesh is a deep yellow and much higher flavored than the Elberta. This Peach sizes up well under heavy crops and is equal to the Elberta as a shipper. A perfect freestone. These qualities combined is fast bringing it to the front as one of our best commercial Peaches and can be considered a three point winner, in color, in size and in quality.

COURTLAND APPLE

Winner of the Wilder Medal, the highest award given new fruits by the American Pomological Society. Combines the good qualities of its parents, McIntosh and Ben Davis, fruit hangs well to the vigorous productive trees, and stands handling. A good keeper. Crisp, tender, juicy, even richer in taste than the McIntosh. Both delicious and profitable.

PRICE LIST FOR SPRING AND FALL OF 1926

PRICE LIST

Note: The growing of select fruit trees is our specialty, our line of stock is complete and our grades run unusually heavy this year. One order of these trees will more than please you. Our wide experience in growing fruit trees for the orchard trade enables us to give to you a well balanced tree, hardy and with an unexcelled root system. When figuring prices, let tree rate run as follows unless otherwise noted: 1 to 6 trees at the each rate; 6 to 50 at the ten rate; 50 to 350 at the 100 rate and 350 to 1000 and more at the 1000 rate.

UNIVERSITY OF MARYLAND

COLLEGE PARK, MARYLAND.

DATE. Aug. 31, 1925.

STATE HORTICULTURAL DEPARTMENT

Certificate of Inspection

Duplicate of Number 78

This is to Certify, That on the 24th day of August 1925 we examined the Nursery Stock of The Bountiful Ridge Nurseries growing in their nurseries, at Princess Anne County of Somerset

State of Maryland, in accordance with the laws of Maryland, 1898, Chapter 239, Section 58, and that said nurseries and premises are apparently free, so far as can be determined by inspection, from the San Jose Scale, Peach Yellows, Pear Blight and other dangerously injurious insect pests and plant diseases.

This Certificate is valid until Sept. 1st 1926 unless sooner revoked, and does not include nursery stock not grown within this State, unless such stock is previously covered by Certificate and accepted by the State Entomologist and State Pathologist.

Wm. W. Boy
State Entomologist.
B. Temple
State Pathologist.
